Discussion on the Project of Running Stochastic Gradient by PyTorch

Last updated: April 10, 2019
Report Format

- Please check the template at the FAQ page
Comments

- When mentioning the best accuracy in the literature, you need a citation (or at least the paper name). It’s ok if the best accuracy you found is worse than others (for CIFAR10, we see values ranged from 94 to 99). This shows you are not copying results from others.
- Please note that the page limit is 2 (including references).
- For your experiments, different accuracy values were reported.
One reason should be that in fact you are not using the default setting

Very likely you use parameters given in a tutorial

- If you mention running time, you should also say your OS and CPU
- Please give your name in the report
