

NASA Homework13

DUE DATE: 06/12/2013 21:00

Please write your answers in the PDF format files

1. What are type 1 / type 2 hypervisors
2. VMMs provide an abstraction of hardware, so do OS'. They also provide resource sharing semantics. So what are the main difference between OS' and VMMs.
(Think about the granularity)
3. How to create and run a VM using Linux KVM via command line?
