

NASA HW7

Deadline: 4/24 21:00

- write your answers in a PDF file.
- 1 paragraph per answer
- Upload to CEIBA

Questions:

1. Write a crontab entry to reboot the system every Saturday at 1:00 AM
 - Use *shutdown* with correct arguments
2. Write a crontab entry to sync time using *ntpdate* every hour
 - Use *tw.pool.ntp.org*
3. Write a sudoers entry that allows *you* to run *ntpdate* without entering password
 - See sudoers (5)
4. What kind of logs are found in */var/log/auth.log*?
5. Write a sequence of commands to create 5 users with a common group.
 - The common group can be the primary group set in */etc/passwd*
 - Or auxiliary group set in */etc/group*
 - You can use *adduser*, *useradd* or even *echo*
