<div align="center">**Some Homework Guidelines**</div>

1   Hard Copy

Unless granted by the instructor in advance, you must turn in a hard copy of your solutions (without the source code) for all problems.

2   Submission By Parts

Each homework set contains 4–5 problems. The students are allowed to submit each problem as a separate part (with names and problem numbers clearly marked). Only the late parts of the submission would be penalized according to the course policy.

3   Source Uploading

Problems that are marked with (*) need to come with the associated source code. The students should upload the source codes via the CEIBA system. First, pack your source codes for each problem separately. Create a single file (zip or tar.gz) for each problem. Then, go to

<div align="center">http://ceiba.ntu.edu.tw</div>

and log in. Finally, link to

<div align="center">http://tinyurl.com/ml08fall-hw</div>

and upload the file associated with each individual problem.

   To avoid late penalty, both your solution and the source codes for the (*) problem need to be submitted on time. Otherwise the whole problem would be penalized according to the course policy.
