Some Homework Guidelines

</div>

1 Hard Copy

Unless granted by the instructor in advance, you must turn in a written/printed copy of your solutions (without the source code) for all problems.

2 Submission By Parts

Each homework set contains 4–7 problems. The students are allowed to submit each problem as a separate part (with names and problem numbers clearly marked). Only the late parts of the submission would be penalized according to the course policy.

3 Source Uploading

Problems that are marked with (*) need to come with the associated source code. The students should upload the source codes via the CEIBA system. First, pack your source codes for each problem separately. Create a single file (zip or tar.gz) for each problem. Then, go to

<div align="center">

http://ceiba.ntu.edu.tw/1001ML

</div>

to upload the file associated with each individual problem.

4 Prediction Uploading

Some sub-problems will ask you to submit the predictions on a test set. The submision website is

<div align="center">

http://main.learner.csie.ntu.edu.tw/php/ml11fall/main.php

</div>

Each individual student will receive the ID (the same as school ID) and password from the TA. The format of the submission for each sub-problem will be announced online. Note that for each sub-problem, you will receive **one chance** of submission. So please use the chance wisely.
