<div align="center">**Some Homework Guidelines**</div>

1   Hard Copy

Unless granted by the instructor in advance, you must turn in a written/printed copy of your solutions (without the source code) for all problems.

2   Submission By Parts

We will not allow submission by parts. Each homework set needs to be submitted in full. If you re-submit any part to the TAs, the submission time of the whole set will be marked with your latest submission.

3   Source Uploading

Problems that are marked with (*) need to come with the associated source code. The students should upload the source codes via the CEIBA system. First, put your source code in each problem as a subfolder named by the problem number (such as 3 or 19). Then, put all the code associated with the problem in the subfolder. Create a single file (zip or tar.gz) that contains all subfolders. Then, go to

<div align="center">http://ceiba.ntu.edu.tw/1041mlearn</div>

to upload the file.

4   Late Submission

Late submissions should go to a box in CSIE R217. It is the student's responsibility to enter the building/room during the closed hours. It is also the student's responsibility to write down the submission time clearly and honestly.
