

Some Mini Wrapup

Hsuan-Tien Lin

Department of CSIE, NTU

OOP Class, May 03-04, 2010

Who Is She?

- The Liskov substitution principle

Let $q(x)$ be a property provable about objects x of type T . Then $q(y)$ should be true for objects y of type S where S is a subtype of T .

Java: S extends T means
(y of type S) **is an** (object of type T)

- The Liskov substitution principle

Let $q(x)$ be a property provable about objects x of type T . Then $q(y)$ should be true for objects y of type S where S is a subtype of T .

Java: S extends T means
